Advanced Periodic Inspection & Testing

Want to become an expert tester?

You have got a testing qualification but want to gain more hands-on expertise.

This course is ideally suited to students who have already taken the City & Guilds 2391 qualification and would now like to expand their understanding of real life situations and gain a more in depth knowledge of the practical skills required. This course is also suitable for those who have gained the City & Guilds 2392 award and would like to experience the methods employed during Periodic Inspection and Testing.

The course has both theoretical and practical content, for example; candidates will be taught efficient and safer inspection and testing techniques while at the same time gaining a fuller understanding of how to apply the regulations.

Time will be spent on techniques to be applied to completing the paperwork including a demonstration of the use of software.

A course book will be provided.

The course will cover in detail the following topics:

- ✓ Inspection & testing of existing installations – overview
- ✓ Why we inspect and test
- ✓ Relevant legislation
- ✓ Pre-Inspection preparation – extent and limitations
- ✓ Intervals, frequency and age of installation
- ✓ Periodic Inspection Report
- ✓ Schedule of Inspections
- ✓ Schedule of Test Results
- ✓ A practical approach to inspection
- ✓ Hands-on testing on our purpose built installation
- ✓ Completing the report – observations and recommendations
- ✓ Fault finding techniques

Candidates will carry out their inspection and testing on our purpose built installation.

Duration

2 days

Cost

£330 + VAT [£379.50]

Includes course notes and buffet lunch each day.
