Electrical Training

- Short intensive courses
- Small class sizes
- Instructors from the industry
- Courses for beginners as well as experienced electricians
- Large, well equipped workshop
- Books available on loan
- All exam fees and refreshments included in the price
- In-house courses by arrangement
- School based in Tring, Hertfordshire

PTT Starter Package (£1,888 + VAT)

This 17-day course is designed for those with no previous electrical experience. It contains all the training required (from basic electricity principles to inspection and testing) to start out as a domestic or commercial electrician.

The syllabus incorporates:

- Installer 1
- Installer 2
- C&G 2382 – 17th Edition Regulations
- C&G 2391 Inspection and Test

PTT Installer 1 (£550 + VAT)

A 5-day course that includes 2 days of electrical theory covering Ohm's Law and ac theory. This is followed by 3 days of practical work that covers, amongst other things; cable types and sizes, construction of lighting, radial and ring circuits and basic testing.

PTT Installer 2 (£550 + VAT)

A 5-day course that builds on the knowledge gained in Installer 1. All 5 days are spent doing practical exercises.

The syllabus includes, volt drop, earth loop impedance, overcurrent protection, testing fundamentals, continuity and insulation resistance testing, design and construction of common domestic circuits, and more...

City & Guilds 2382-10 (£415 + VAT) BS7671 17th Edition Wiring Regulations

This is a basic qualification required by all electrical installers. Our course lasts 3 days and provides insight into the structure and meaning of the latest Wiring Regulations. The course concludes with a computer-based examination. A pass will result in the award of a C&G certificate.

City & Guilds 2382-20 (£200 + VAT)

This one-day update course is suitable for those who have achieved their 2381 qualification and want to bring it up-to-date and conform to the 17th Edition. The day concludes with a computer-based examination, and a pass will result in the award of a C&G certificate.

City & Guilds 2391 (£520 + VAT) Inspection, Testing and Certification of Electrical Installations.

A 4-day course with a syllabus covering the theoretical and practical aspects of Inspection and Testing. It is strongly advisable to take this course if you are planning to apply for Part P registration.

The course includes a practical assessment and a written examination. A pass will result in the award of a C&G Certificate.

City & Guilds 2391-02 (£710 + VAT) Design, Erection and Verification of Electrical Installations.

This course is aimed at those who already have a 2391 qualification and aspire to become designers or qualifying managers or who simply wish to increase their professional expertise. The course is 5 days and includes a 3-hour written examination and a 20 hour project which is started on the course but needs to be completed at home.

2391 Written Revise Day (£235 + VAT)

A 1-day revision course covering theory and past papers, usually held the day before the written exam. Course price includes the cost of re-taking the written paper.

2391 Practical Revise Day (£185 + VAT)

A 1-day course involving revision and practise testing in the morning, followed by the practical exam in the afternoon.

It is also possible to come to our centre and re-sit the written exam only for either the C&G 2382 or 2391. Please telephone the office for details.

Short Courses

Testing of Electrical Installations – (£158 + VAT)

This 1-day course involves the practical application of BS7671 Part 7 tests and is ideal for those who have just passed their C&G 2391 but require extra testing practise as it provides the opportunity to become more proficient on a wide variety of circuits.

Boiler Control – (£315 + VAT)

A 2-day course that covers practical wiring and fault finding on common central heating configurations, including; C Plan, Y Plan, Gravity, Vented and Unvented.

Consumer Unit Upgrade – (£158 + VAT)

A 1-day practical course on changing/installing consumer units including inspection and testing.

C&G 2377-12 PAT Testing – (£200 + VAT)

A 1-day course for electricians who wish to offer portable appliance testing to their customers. The day will conclude with a computer-based multiple choice 1 hour examination. A pass will result in the award of a City and Guilds certificate.

C&G 2377-11 Management of Electrical Equipment Maintenance – (£200 + VAT)

A 1-day course aimed at managers who have the responsibility for maintenance within a building or managers within an organisation responsible for Inspection and Testing. The day concludes with a computer-based multiple choice 1 hour examination. A pass will result in the award of a City and Guilds certificate.
