

COURSE DATA SHEET

| Fire Alarms Systems BS 5839-1:2017

This **EAL accredited** 2-day course is intended to cover the Code of Practice for design, installation, commissioning and maintenance of systems in non-domestic premises.

Course Content

- The course reviews the detail requirements of BS 5839 Parts 1 with reference to Part B of the building regulations.
- Legislative Framework
- Codes of Practice
- Design Responsibility
- Definitions, Grades, Categories and Specifications
- Equipment Specifications
- Installation
- Documentation
- Maintenance and Servicing

To achieve this EAL qualification delegates are required to pass a 50- question multiple-choice on-line paper

The course is suitable for enforcing authorities, designers, installers and maintenance personnel responsible for these systems. It is also useful to electricians to gain an understanding of the standard

The course is modular providing both theory and practical requirements of installing and maintaining the fire detection systems.

Duration & Cost

2 days
£445 + VAT (£534)
