City & Guilds 2391-51 Periodic Inspection

This four-day level 3 course covers the requirements of BS 7671 for inspection, testing and certification and is designed to prepare candidates for both the online and practical examinations.

This qualification is suitable for candidates wishing to carry out Periodic Inspection of electrical installations. Candidates gain the skills and knowledge necessary to perform periodic inspection and testing procedures by practicing on purpose-built training rigs which simulate electrical installations with/without faults. Instruction is given to allow candidates to become proficient at completing the electrical installation certificate and the electrical installation condition report.

Course Content

- Requirements of 18th Edition Wiring Regulations for inspection, testing and certification
- Earth fault loop revision
- Periodic Inspection and Testing
- Compliance with relevant legislation
- Determine suitability of installations
- Testing procedures
- Use of test instruments
- Test result verification
- Certification

To achieve this qualification delegates are required to pass two practical assessments, short answer written questions and a 90- minute open-book multi-choice exam

Who should attend this course?

- We strongly recommend that candidates have the latest City & Guilds Wiring Regulations qualification prior to taking this course, although this is not a mandatory entry requirement.
- Some previous experience of inspection and testing techniques is beneficial.

Duration & Cost

4 days

£620 + VAT (£744)

Includes examination fees and a buffet lunch each day.
